

# Appendix A. Data Dictionary

## Dataset Title

**Patterns of Herbal Medicine Use and Safety Awareness among Syrian Adults:  
Implications for Arabic Digital Health Education – Cross-Sectional Survey**

Dataset Version: v1.0

Final Analytical Sample: N = 287

Collection Period: 15 April – 20 May 2026

---

## Variable 1

### Variable Name

gender

### Survey Question

الجنس

### Variable Type

Categorical

### Coding

#### Code Meaning

1 Male

2 Female

---

## Variable 2

### Variable Name

age\_group

### Survey Question

الفئة العمرية

## Variable Type

Ordinal categorical

## Coding

### Code Meaning

|   |       |
|---|-------|
| 1 | 18–25 |
| 2 | 26–35 |
| 3 | 36–50 |
| 4 | >50   |

## Note

Participants younger than 18 years were excluded prior to analysis.

---

## Variable 3

### Variable Name

education

### Survey Question

المستوى التعليمي

## Coding

### Code Meaning

|   |                     |
|---|---------------------|
| 1 | Less than secondary |
| 2 | Secondary           |
| 3 | Bachelor's degree   |
| 4 | Postgraduate        |

---

## Variable 4

### Variable Name

healthcare\_background

### Survey Question

هل تعمل أو تدرس في مجال صحي؟

## Coding

### Code Meaning

|   |     |
|---|-----|
| 0 | No  |
| 1 | Yes |

---

## Variable 5

### Variable Name

herbal\_use

### Survey Question

هل تستخدم الأعشاب الطبية؟

## Coding

### Code Meaning

|   |     |
|---|-----|
| 0 | No  |
| 1 | Yes |

---

## Variable 6

### Variable Name

herb\_drug\_awareness

### Survey Question

هل تعلم أن الأعشاب قد تتداخل مع بعض الأدوية؟

## Coding

### Code Meaning

|   |     |
|---|-----|
| 0 | No  |
| 1 | Yes |

---

## Variable 7

### Variable Name

natural\_safe\_belief

## Survey Question

المنتجات الطبيعية آمنة بالكامل

## Coding

Likert scale

| Code | Meaning           |
|------|-------------------|
| 1    | Strongly disagree |
| 2    | Disagree          |
| 3    | Neutral           |
| 4    | Agree             |
| 5    | Strongly agree    |

---

## Variable 8

### Variable Name

professional\_consultation

## Survey Question

استشارة الطبيب أو الصيدلي قبل استخدام الأعشاب

## Coding

Likert scale

| Code | Meaning   |
|------|-----------|
| 1    | Never     |
| 2    | Rarely    |
| 3    | Sometimes |
| 4    | Often     |
| 5    | Always    |

---

## Variable 9

### Variable Name

digital\_resource\_interest

## Survey Question

هل ستستخدم تطبيقاً عربياً موثقاً للمعلومات العشبية؟

## Coding

| Code | Meaning |
|------|---------|
|------|---------|

- |   |                |
|---|----------------|
| 1 | No             |
| 2 | Probably not   |
| 3 | Maybe          |
| 4 | Yes definitely |
-

# Appendix B. Codebook

## Missing Data

### Rule

Blank responses coded as:

NA

---

## Exclusion Criteria

Records excluded if:

Age <18 years

Excluded records:

13

---

## Final Sample

N = 287

---

# Appendix C. Analysis Dataset Description

## Dataset Name

Syrian\_Herbal\_Survey\_Cleaned\_N287.csv

---

## Structure

### Observation Unit

One row = one participant

---

### Number of observations

287

---

## Number of variables

(To be finalized after coding)

Expected:

20-30 variables

---

## Statistical Analyses Performed

### Descriptive

- Frequencies
  - Percentages
- 

### Exploratory Inferential

Pearson Chi-square:

1. Healthcare background × Interaction awareness
  2. Education × Natural-safe belief
  3. Healthcare background × Use without consultation
  4. Healthcare background × Interest in Arabic digital resource
- 

## Significance Threshold

$p < 0.05$
